

When someone buys a kart for the first time, they need all the help they can get.

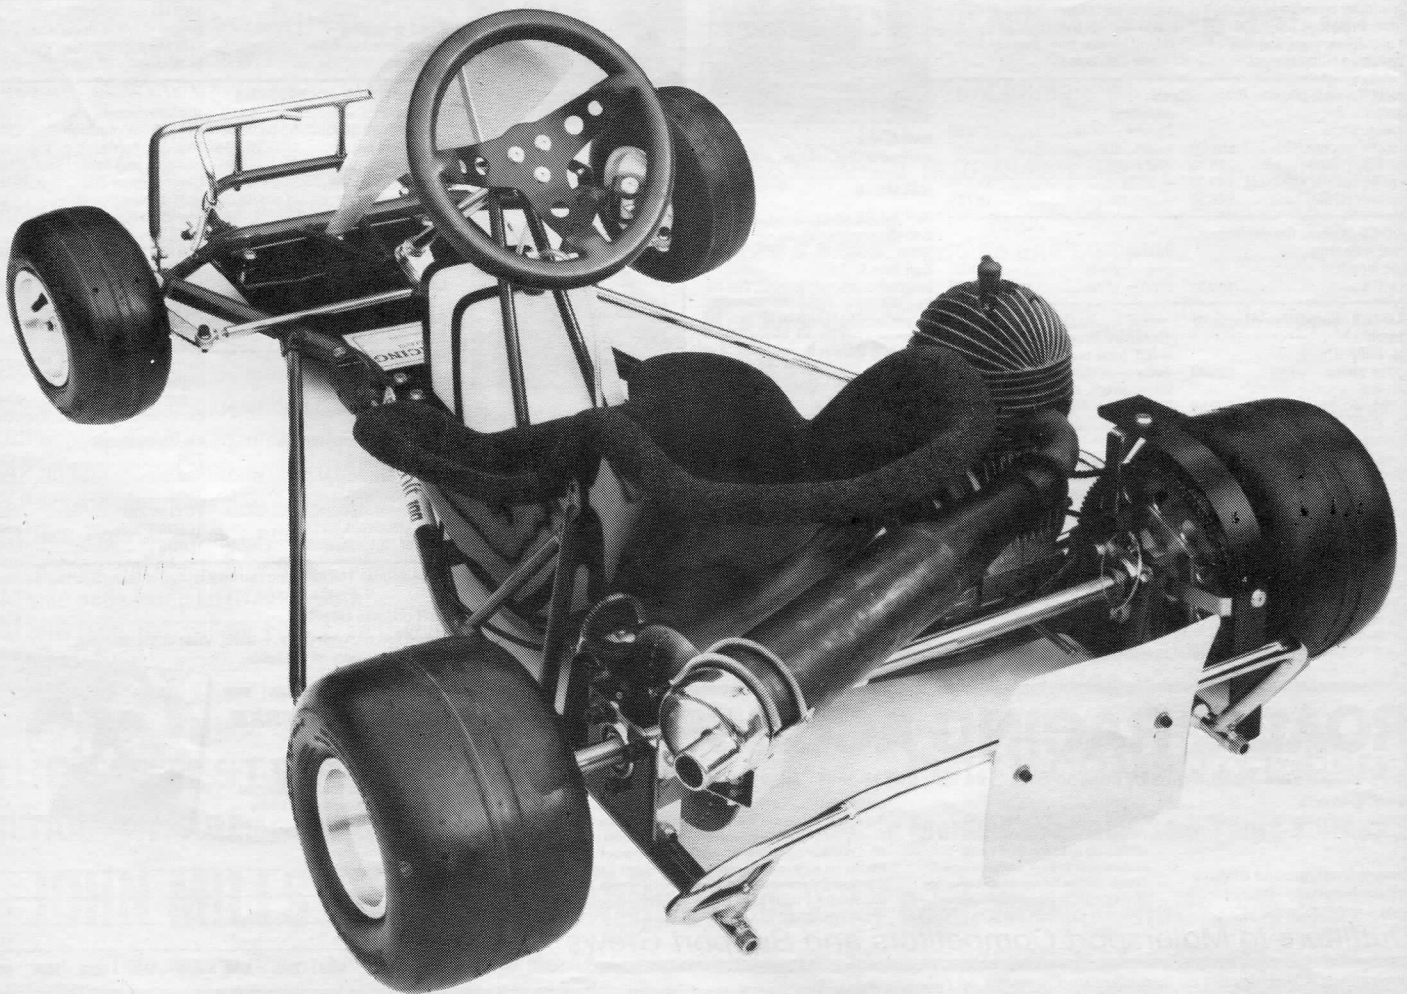

So if it's your first purchase, with the COLT 100 or COLT 60 for cadets, you not only receive an instruction manual, a rarity in its self from other manufacturers, but a starter kit.

The kit will consist of a 5 litre petrol can, measuring jug, a set of metric allen keys, 10mm, 13mm, 17mm, 19mm spanners, spare spark plug, plug spanner, foot tyre pump, pressure gauge, tape measure, screw driver and a hammer.

You will need more than these items as you progress, but we think this will give the newcomer a good start, after all it will stop them having to borrow or continuously having to run to the shop five miles from the circuit.

Ricky and Dave Grice will also be there, on many occasions for the experienced racer on race day too, getting their hands dirty to help Grice Racing Services customers.

For prices and the complete range of service contact Grice Racing Services at 57, Winifred Road, Pitsea, Basildon, Essex. Tel: 0268 551394.
