The CIK have just published a list of tyres which have been homologated for use in the CIK Group 2 classes from the beginning of 1996 to the end of 1998.

Group 2 consists of the Intercontinental classes i.e. Int-A (100cc reed valve), Int-A/Junior (100cc piston port), Int-C (125cc) and Int-E (250cc single cylinder). Only Int-E are allowed to use 6" tyres and only the tyres designated 'ICE'.

Above: Dunlop KT6 wets for Intercontinental-E as displayed at Autosport International.

Below: Two of the four slicks homologated by All Tyres of Italy.
